Quick access

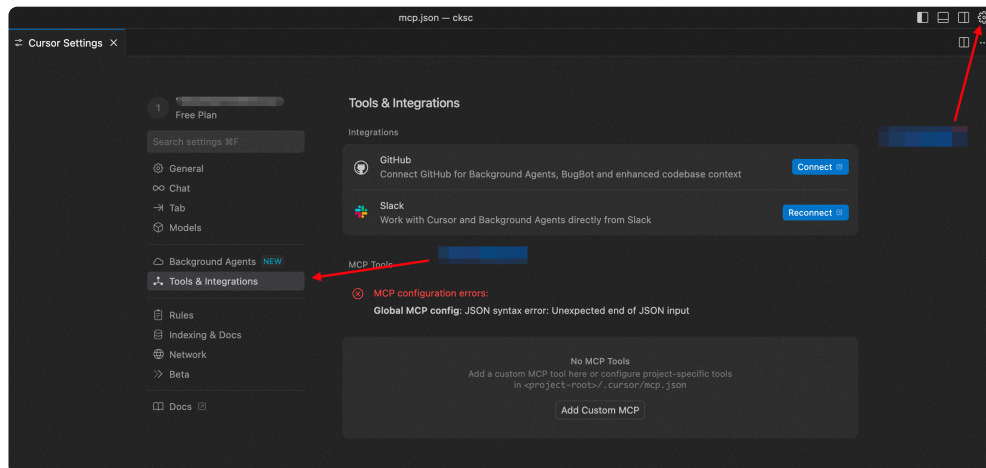

Clients that support any MCP protocol (e.g. Cursor, Claude, Cline) can easily use TGMW MCP server, and currently support SSE access method.

Cursor platform SSE access to MCP service

Install Cursor

It is recommended to use the latest version of Cursor client to install Cursor.

Enter the Cursor setup interface to configure the SSE connection.

Add a new MCP Server configuration

```
{
  "mcpServers": {
    "skywork-office-tool": {
      "url": "<https://api.skywork.ai/open/sse?secret_id=SecretID&sign=xxxxxxxxxxx>"
    }
  }
}
```

Sign Encryption Rules :

md5 (SecretID: SecretKey)

for example:

SecretID is aaaaaaaa

SecretKey is bbbbbbb

Sign is md5(aaaaaaaa:bbbbbbb) = e1064e0c9f146389228a1d41b989950e

url is "https://api.skywork.ai/open/sse?secret_id=aaaaaaa&sign=e1064e0c9f146389228a1d41b989950e"

you can generator sign in <https://www.md5hashgenerator.com/>

[Go Back](#)

aaaaaaaa:bbbbbbb

Generate →

Your String	aaaaaaaa:bbbbbbb
MD5 Hash	e1064e0c9f146389228a1d41b989950e Copy
SHA1 Hash	f48a5599df1e5e4180e94d91da5fde8bab8e9fbd Copy

This MD5 hash generator is useful for encoding passwords, credit cards numbers and other sensitive data.

Return to the Cursor setup interface to view the MCP service tool status
